PROJECTS

AI Recipe Generator

- I built an AI Recipe Generator as a final project for SheCodes Plus AI. It transforms user prompts into engaging recipes using an AI API. It features Markdown rendering, dynamic typewriter effects for an interactive cooking experience. The app is fully responsive and delivers recipes in the browser's language for a better user experience. [View Project]

FSW Barber

- FSW-Barber is a mobile-first web application designed for booking appointments at barbershops. Developed during the Full Stack Week, this project emphasizes a seamless user experience for clients seeking to schedule services online. [View Project]
