PROFESSIONAL EXPERIENCE

WPP Production — Front-End Developer Nov 2025 - Present

- Develop responsive HTML/CSS email templates while ensuring cross-client compatibility and responsive behavior.
- Implement pixel-perfect layouts based on provided designs in fast-paced production environments.
- Work with CRM email platforms, dynamic content, tokens, fragments, and metadata configurations.
- Collaborate with QA analysts, PMs, copywriters, and coordinators while managing multiple concurrent tasks and tight deadlines.
- Adapt quickly to evolving client requirements and production standards.

PROJECTS

AI Recipe Generator

- AI-powered recipe generator built with JavaScript and API integration. Features responsive design, Markdown rendering, and multilingual support. [View Project]

FSW Barber

- Mobile-first barber shop booking application built with Next.js and React. [View Project]
